Basic: MySQL | HTML | PHP

PROJECTS

Theme Park Management System (HTML/PHP/Js/MySQL)

Jan. 2019 - May 2019

An web-based database management system for a theme park employer.

- Applied HTML and Javascript to deploy a simple but effective web design.
- Used MySQL and PHP to connect an employee database to the web-based DBMS.
- Collaborated with a team of 5 to meet deadlines and project requirements.

B-Spline MRI Imaging (Python)

Jan. 2019 - May 2019

A Python program that maps a given 3 dimensional vien into an MRI slice of the user's choice.

- Applied Python to take an input of 9 million three-dimensional MRI data points of a brain and blood vessel data and output a three-dimensional model of the blood vessel juxtaposed with the brain image.
- Collaborated with a team of 3 to meet deadlines and project requirements.
